 **PANORAMA**
RADIOLOGY SPECIALISTS

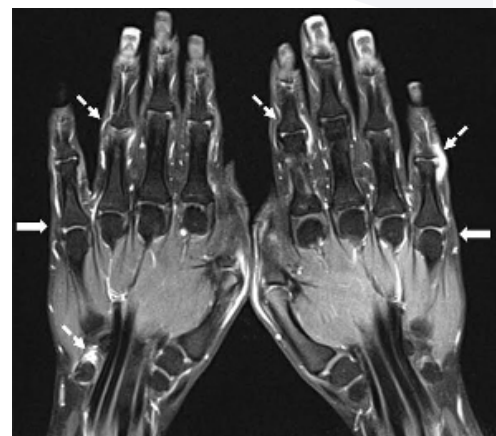

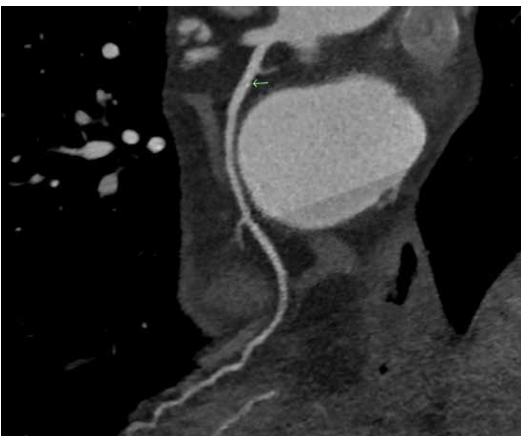

Panorama Radiology Specialists is a comprehensive new independent medical imaging clinic located at 117 Ashmore Rd, Benowa, opening on April 17, 2023.

Panorama's principal radiologist and founder, Dr Angus Watts, is a Fellowship-trained musculoskeletal and interventional radiologist, has CTCA accreditation, and has provided general, musculoskeletal and interventional radiology services to the Gold Coast community since 2004 as a former managing partner and clinical director at South Coast Radiology.

As the Benowa medical precinct's only comprehensive, doctor-owned medical imaging practice, the friendly and highly experienced team at Panorama are committed to providing the Gold Coast community with a premium, more personalised and patient-centric service using state of the art technology, without the high volume demands experienced by many corporate providers.

Our 800sqm large-format Benowa clinic is located at 117 Ashmore Rd (in the AMart complex) and offers extensive parking, easy ground floor access and onsite conference facilities. The practice adjoins the new Benowa Medical Hub medical suites, opening in 2023, and on completion will represent one of the largest radiology clinics in the region.

General Medical Imaging.
Spine, Joint & Interventional Specialists.

Services

Panorama Radiology Specialists offers comprehensive general diagnostic imaging in addition to subspecialist musculoskeletal and interventional services, 3T MRI with Noise Reduction technology and MRI Cinema, low-dose Cardiac CT, EOS Scans, Bone Densitometry, Body Composition Scans, Echocardiography, OPG, Cephalometry and CT Dentascans.

Panorama's principal radiologist, Dr Angus Watts, has almost 2 decades of experience providing radiology services to the Gold Coast community, including general, musculoskeletal interventional services at Pindara and John Flynn Hospitals, and served as musculoskeletal radiologist at the 2018 Commonwealth Games. Dr Watts is delighted to be able to provide his services under his own independent banner, and is always happy to discuss appropriate imaging pathways or imaging guided pain management procedures with referring clinicians, which may be beneficial in a patient's individual clinical situation.

Panorama's onsite services will include:

- **3T MRI with -**
 - AI image enhancement
 - 70% Noise Reduction
 - MRI Cinema
- **LOW DOSE 640-SLICE CT with -**
 - AI image enhancement
 - Dose Reduction by up to 70%
- **ULTRASOUND - all General and Subspecialty scans**
- **GENERAL X-RAY**
- **EOS spine and body imaging**
- **IMAGING-GUIDED PAIN MANAGEMENT and BIOPSIES**
- **ULTRA-LOW DOSE CT CORONARY ANGIOGRAPHY & CALCIUM SCORING**
- **ECHOCARDIOGRAPHY**
- **BONE DENSITOMETRY**
- **BODY COMPOSITION SCANS**
- **OPG, CEPHALOMETRY and CT DENTASCANS**
- **PROSTATE mpMRI**
- **MRI DISCOGRAPHY - non-invasive technology to aid localization of discogenic back pain**
- **SPECTRAL CT - gout**

Emerging Technologies

The Panorama team are passionate about exploring new and innovative technologies, and are excited to offer emerging imaging technologies with limited commercial availability such as MRI Discography (Disc Spectroscopy) which uniquely enables non-invasive localisation of discogenic back pain; and MRI Diffusion Tensor Imaging (DTI) which allows detailed mapping of muscle fibre tears and neural pathways.

Panorama's state of the art **3T MRI** is equipped with sophisticated AI Image Enhancement technology, which significantly enhances anatomical detail of fine musculoskeletal structures such as the Scapho-lunate Ligament and Ankle Syndesmosis.

Our MRI scanner is also equipped with technologies to maximize patient comfort including **MRI Cinema** (in scan audiovisual entertainment), Noise Reduction technology to reduce obtrusive MRI scan noise by around 70%, and a wide-bore tunnel.

Our 640 slice CT scanner is also equipped with AI Image Enhancement and dose reduction technology which allows 70-80% dose reduction compared with earlier generation scanners; enables scanning of peripheral parts such as ankles and feet using radiation doses comparable to conventional XRays; enables CT Coronary Angiography at up to 70-80% lower doses than conventional CT units; and CT Dentascan technology for high resolution low dose dental imaging.

Appointments can be made by calling Panorama's friendly reception team on **07 56545133** or book online at www.panoramadiology.com.au

Patients can download the Panorama Radiology Specialists App for Apple or Android, to enable quick viewing of results and images, and to share images with your clinician.

Referrers are able to view images through our Zero Footprint viewer or Intelliviewer. If you are a referring clinician please follow the links on our Results Portal page at panoramadiology.com.au to get set up with Intelliviewer or get IT support, or call reception on 07 56545133.

BULK BILLING of Medicare-eligible referrals.
